

Since 2001

Maintenance Instructions of toilet cubicles:

For the panel:

- Use a damp cloth or towel which is soft and hydrophil making sure no sharp edges will contact with the panels to remove the stains and spots. Of course, to keep the ventilation is also as one of the ways. If something questions happen in the guaranteed period except for man-made destruction, you can make a immediate contact with the seller.
- Avoiding the bleach in the water and scale which can lighter the color of the toilet cubicles and affect the beauty of appearance.
- Strictly prevent the touch from potent chemicals, such as paint agents, metal cleaners , stove cleaning agent , methylene chloride , acetone (nail-enamel remover) , acid cleaning agents and etc. If you accidentally touch with these items , rinse immediately with plenty of soap and water surfaces.

As for the hardware:

- To keep your toilet cubicles always shining and bright, to do the frequent clean of the hardware is necessary.
- Buy the mild anti-germs cleanser and use the damp cloth to wipe the fittings and remember not to use the cleanser with corrosive chemicals.
- Moreover, don't forget to make the periodic inspection to make sure that the toilet cubicles are still in supervision. Of course, if people can protect the **toilet cubicles** and use it in a moderate way, it will help a lot in prolonging the service life.
